

Welcome to Tekno North America

Tekno - can be defined in one phrase, “**Commitment to Quality**”

One only has to take several pieces of our flooring and “hand fit” them together to convince yourself of our superior construction, fit, finish and wood grading.

Tekno, an Italian manufacturer located near Naples, started in 1990 with traditional solid wood flooring. They quickly innovated and converted into the production of pre-finished engineered flooring formats. Tekno takes particular pride in their “state of the art” finish which equals the look of the finest furniture finishes. We invite you to compare Tekno’s finish to the typical, rougher looking, flooring finishes found on the market today. In addition to producing exquisite flooring, Tekno NA offers it’s distribution partners and their retailers the finest sales tools, which reflect the quality of the flooring presented.

Wood Flooring International (WFI), who manages Tekno NA, is the exclusive marketing arm for Tekno in North America. WFI is proud to present this line into the North American market. We truly consider it to be the world’s finest flooring !

Be sure to fill out the registration form on the following page or go to:
