

Ash, White European / Species Info

The Species:

Flooring Trade Name: European White Ash
Botanical Name: Fraxinus, excelsior
Lumber Name: White Ash
Grows In: Europe, with related species in North America.

Products Available in Ash, White European

See page 3 for a listing of all the products available in European White Ash. See page below for a listing of all the products available in this species: [Products / Ash, White European](#)

Description

European White Ash is very similar in graining to oak. European White Ash is offered by Tekno NA as it provides more of the pale cream coloration than the North American species.

Color Range & Color Change

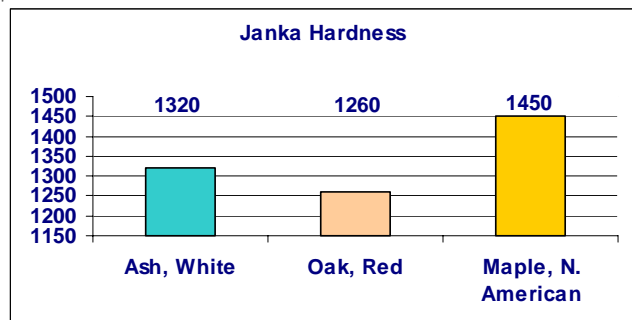

Color Range: European White Ash varies greatly in color from a blond cream color to the darker tans and browns found closer to the heart of the tree. Tekno NA offers European White Ash, which has the same appearance as American White Ash but a higher percentage of the blond cream colors.

Color Change: European White Ash undergoes a medium degree of color change over time by ambering from a pale cream colored when freshly sanded to a more a straw tan color as it ages.

View [Tekno NA's European White Ash Photo Page for photos](#) of the typical color range and change to be expected, as well as the various grades offered.

Hardness

European White Ash is 105% as hard as red oak (1320 on the Janka scale vs. 1260 for red oak).
